

Network building -
Working together as new teams

Capacity planning -
To plan the right skill mix

Strategy development -
Deciding what the network will do

Care Navigation -
To utilise the new skill mix

Recruitment -
To deliver the right skill mix

Project planning -
How the network will do it

Negotiation skills -
agreeing what the network will do

Primary Care Network Support

Why Xytal?

Our track record of effective change speaks for itself. We are trusted advisors to over 750 practices. Using our proven methods incorporating locality meetings and practice visits we are in a unique position to bring practices together and engage them in collaborative working.

As networks develop we will be on hand to support them through the speed bumps that our experience allows us to predict;

- Network building – working together as new teams
- Capacity planning – to plan the right skill mix
- Recruitment – to deliver the correct skill mix
- Care navigation- to utilise the new skill mix
- Strategy development – deciding what the network will do
- Negotiation skills – agreeing what the network will do
- Project planning – how the network will do it

There is a great deal to be achieved in 2020. Following formation and the appointment of clinical leads, the networks will need to begin working together. Many of these practices may not have a history of, or even a desire for, joint working.

Lets start a conversation:

Call: 0113 834 5015 • Email: info@xytal.com

“

The development of Primary Care Networks offers an opportunity to place the General Practices where they seek to be; at the centre of the NHS, side by side with the patients.

2020, will have the practices at it's core, working together, however, delivering that ambition may need some support, which Xytal are well placed to provide.

“

People don't mind change, they don't like being changed.

- Peter Drucker
